NOTES:

- (1) 2-Pane IG unit calculations based on 2 litres of 1/8" (3.0/3.1mm) glass and 1/2" (13.0mm) airspace.
- (2) Indoor Glass Temperatures are for the center portion of the glass.
- (3) Calculations for argon filled unit made with 90% Argon/ 10% air.
- (4) NFRC 100-2002 Environmental Conditions used for all values.
- (5) The Krochmann Damage Function is based on wavelengths from 300nm to 600nm.
- (6) The Fading Function Tdw-ISO is based on wavelengths from 300nm to 700nm.
- (7) SC = SHGC / 0.87
- (8) Values for Pyrolytic LOW E based on Pilkington Energy Advantage™ Low-E
- (9) LSG (light to solar gain) = VLT/SHGC
